

Did I just wake up and find that I have lost my mind? What country am I living in? Nazi Germany? This country is out of control. When a business is built, and Special Interest groups try to bring it down because it is competition? I hope that any congress person or representative is tossed out on thier butts for the corrupt practice of support a lobby group to dismantle a legitimate and fair business. Do the right thing and stop this madness. XM radio and all satellite radio have the right to broadcast any local information that they choose. I am paying for this service with my own money, don't tell me what services I pay them to provide me. That is the right thing.

sincerely,

Ken
